LCN is a natural-looking carefree alternative for women who experience challenges growing their own nails. Light Concept Nails (LCN) is a light cured resin, perfected by a chemist in Germany. LCN offers superior performance to other nail products because it's flexible, customizable, and odorless, doesn't yellow, doesn't lift like acrylic and is gentle on natural nails because there are no aggressive additives. LCN allows wearers to extend the length of their nail or provide a 'heavy duty' overlay to provide additional strength. Standard recommendation of fills is every two (2) weeks but can vary. Consult with your nail technician to determine the appropriate maintenance schedule.

Sand and Seal is for those times when LCN nails need a refreshing, not a fill. It includes cuticles pushed back, outgrowth demarcation filed down, reshaping and the reapplication of sealant. Sand & Seal is not recommended if your nails are lifting or require repairs.
